What is NIDAA?

NIDAA is an offline Bluetooth-based mobile app for emergency and group messaging when no internet or GSM

Use Cases:

1. Civil Defence & Forest Fire Response:
- Enables coordination between field units during wildfires or rescue operations.
- Functions in areas with poor mobile coverage.

2. Scouts & Outdoor Activities:
- Keeps groups connected in mountains, forests, or national parks.
- Great for summer camps or hiking trips.

3. School Trips & Field Excursions:
- Keeps teachers and students connected offline.
- Increases safety in rural or remote areas.

Key Features:

- Bluetooth-based mesh messaging
- Works without SIM, internet, or Wi-Fi
- Simple and fast emergency alerts
- Ideal for rural Tunisia and disaster zones

Vision:

To support Tunisian national safety, education, and youth programs by making communication accessible in an
